Full Stack Engineer
Clean Code / Software Development / Product Development

Accomplished professional respected for 8+ years of web and software development achievements for high-profile organizations. Ensures clean, reusable code under strict deadlines and heavy workloads. Builds lasting relationships and provides strong project leadership. Critical thinker with high curiosity, offering creative solutions to complex, time-sensitive problems while ensuring results exceed all expectations.

Core Competencies

Full Stack Development / Web Applications / Software Development / Product Development / Quality Code
Complex Problem-Solving / Leadership & Collaboration / Communication / Reporting / Architectures
Client Support / Time Management / User Interaction / Process Improvement / New Technologies & Software

PROFESSIONAL EXPERIENCE

FinAccel Pte Ltd   2021 – Present
Full Stack Engineer
- Provided crucial input to the internal tool applications lifecycles, including extensive coding and debugging. Wrote clean code and produced reusable solutions/libraries despite challenges.
- Coordinated with 4 people and offered expertise on company solutions (automation, credit risk).

AiChat Pte Ltd   2018 – 2021
Full Stack Engineer
- Noted for vital contributions to applications lifecycles, showcasing a superior work ethic across coding and debugging. Wrote clean code and received the best possible performance reviews.
- Troubleshot/debugged applications, built reusable code and libraries, and promoted continuous improvement.
- Aligned with Product Managers and provided training to various team members.

PT Masskredit Pasifica Raya   2017 – 2018
Lead Backend Engineer
- Improved methods to assess data, processes, and code to troubleshoot problems and improve functionality throughout full lifecycle software development. Ranked among the top of all engineers/developers.
- Programmed well-designed, testable, efficient code that was used as a gold standard for software.
- Headed projects and integrated the latest methodologies for increased productivity.

PT Smooets Teknologi Outsourcing   2016 – 2017
Full Stack Engineer
- Developed frontend and backend website architecture under strict deadlines and heavy workloads.
- Designed user interactions, developed APIs, and ensured responsiveness in-line with strict organization standards and client needs. Became a go-to resource for developments in web applications and programming.
